Recent Advances in Lymphomas

Message from the Guest Editor

Lymphomas represent transformations within the lymphoid system. Various subtypes with diverse biology, morphology, clinical presentation, and prognosis can be distinguished. Progress in the early detection of lymphoma is giving patients more treatment options than in the past. New drugs, targeted therapies, and gene therapies have the potential to revolutionize the way we treat malignant lymphomas. This Special Issue will focus on recent developments in our understanding of lymphoma and possible paths towards reducing the burden of the disease.

About the Journal

Message from the Editor-in-Chief

Life (ISSN 2075-1729) is an international, peer-reviewed open access journal that publishes scientific studies related to fundamental themes in life sciences. Some papers are published individually, while others are submitted for inclusion in special issues with guest editors. You are invited to contribute a research article, essay, or a review to be considered for publication.

Editor-in-Chief

Prof. Dr. Lluís Ribas de Pouplana

Institute for Research in Biomedicine (IRB Barcelona), The Barcelona
Institute of Science and Technology, 08028 Barcelona, Spain

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Biology) / CiteScore - Q1 (Paleontology)
