Clinical and Laboratory Advancements and Challenges in Medically Assisted Reproduction

Message from the Guest Editors

Medically assisted reproduction (MAR) has progressed greatly since the birth of Louise Brown in 1978. pregnancy rates have increased; obstetric healthcare is safer, and multiple pregnancy and complication rates are significantly reduced; more infants are in good health; and millions of people have been able to have the families they desire. This Special Issue seeks to explore the latest clinical and laboratory advances that have contributed to these improvements alongside the ongoing challenges facing this field of healthcare. Topics of interest include innovations in MAR technologies and advancements in genetic testing. This Special Issue will also cover patient-centered approaches to treatment, the impact of MAR on public health, and future trends in reproductive technologies.

About the Journal

Message from the Editor-in-Chief

Life (ISSN 2075-1729) is an international, peer-reviewed open access journal that publishes scientific studies related to fundamental themes in life sciences. Some papers are published individually, while others are submitted for inclusion in special issues with guest editors. You are invited to contribute a research article, essay, or a review to be considered for publication.

Editor-in-Chief

Prof. Dr. Lluís Ribas de Pouplana

Institute for Research in Biomedicine (IRB Barcelona), The Barcelona
Institute of Science and Technology, 08028 Barcelona, Spain

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Biology) / CiteScore - Q1 (Paleontology)
