# Stem Cells in Regeneration and Diseases

## Message from the Guest Editor

Stem cells, either embryonic, adult, or of engineered origin (e.g., iPS cells), have been used extensively in many research directions in recent decades. In addition, owing to their unique ability of self-renewal and long-term proliferation as well as differentiation, stem cells have become not only major players in regenerative medicine but also potential targets of diseases.

This Special Issue will address the most advanced knowledge of stem cells and stem cell niches, aiming at presenting the most forefront issues in stem cell research to be discussed. The authors are encouraged to include any conflicting data and concepts in the past and present to promote current and future investigations in stem cell research.

## **About the Journal**

## Message from the Editor-in-Chief

Life (ISSN 2075-1729) is an international, peer-reviewed open access journal that publishes scientific studies related to fundamental themes in life sciences. Some papers are published individually, while others are submitted for inclusion in special issues with guest editors. You are invited to contribute a research article, essay, or a review to be considered for publication.

#### **Editor-in-Chief**

Prof. Dr. Lluís Ribas de Pouplana

Institute for Research in Biomedicine (IRB Barcelona), The Barcelona Institute of Science and Technology, 08028 Barcelona, Spain

#### **Author Benefits**

## **Open Access:**

free for readers, with article processing charges (APC) paid by authors or their institutions.

## **High Visibility:**

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, CAPlus / SciFinder, and other databases.

## **Journal Rank:**

JCR - Q1 (Biology) / CiteScore - Q1 (Paleontology)
