

## Special Issue

# Recent Developments in Movement Disorders

### Message from the Guest Editors

Movement disorders pose significant challenges in clinical management, with conditions such as Parkinson's disease/syndrome, dystonia and tremors. Despite substantial efforts, the precise etiology of movement disorders remains elusive. Nonetheless, recent developments in clinical interventions have led to notable improvements, facilitating the identification of the underlying mechanisms. This Special Issue aspires to compile comprehensive review articles and pioneering research investigations to elucidate recent developments in movement disorders. By assessing the current state of our understanding, this collection seeks to propel future advancements in treatment strategies.

## About the Journal

### Message from the Editor-in-Chief

*Life* (ISSN 2075-1729) is an international, peer-reviewed open access journal that publishes scientific studies related to fundamental themes in life sciences. Some papers are published individually, while others are submitted for inclusion in special issues with guest editors. You are invited to contribute a research article, essay, or a review to be considered for publication.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, CAPIus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q1 (Biology) / CiteScore - Q1 (Paleontology)
