Current Approaches and Future Directions in the Treatment of Gynecologic Tumors: Molecular Biology, Diagnostic Advancements and Targeted Therapeutic Strategies

Message from the Guest Editor

Gynecologic tumors represent a serious public health problem as they are associated with high rates of morbidity and mortality. In recent years, the multidisciplinary integrative approach has enabled significant progress to be made in this field, which has led to a better understanding of molecular mechanisms and advanced diagnostic methods, facilitating the implementation of targeted therapies. Although oncologic medicine is becoming increasingly personalized, several knowledge gaps and unsolved problems remain. Thus, future scientific research should offer new perspectives regarding better deciphering the biology of tumor processes, early diagnosis criteria, and therapeutic strategies to improve prognoses. In this Special Issue, through the lens of the latest medical research, I aim to highlight the continuously growing role of the integrative approach to the management of gynecologic tumors regarding intervention in biomolecular mechanisms, diagnostic criteria, and therapeutic strategies

About the Journal

Message from the Editor-in-Chief

Life (ISSN 2075-1729) is an international, peer-reviewed open access journal that publishes scientific studies related to fundamental themes in life sciences. Some papers are published individually, while others are submitted for inclusion in special issues with guest editors. You are invited to contribute a research article, essay, or a review to be considered for publication.

Editor-in-Chief

Prof. Dr. Lluís Ribas de Pouplana

Institute for Research in Biomedicine (IRB Barcelona), The Barcelona
Institute of Science and Technology, 08028 Barcelona, Spain

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Biology) / CiteScore - Q1 (Paleontology)
