New Advancements in Cardiac Imaging

Message from the Guest Editor

The world of cardiology is in constant turmoil with increasing advances in both the diagnostic and therapeutic fields. Technological innovations in imaging and increasingly personalized treatment paths have made it possible to reduce the impact of cardiovascular diseases on patients' quality and quantity of life. In addition, the development of artificial intelligence and its application to the medical discipline can significantly enhance our ability to obtain a correct diagnosis in a short time and to manage the treatment program in the most suitable manner. The purpose of this Special Issue is to take stock of where things are today, and above all to deep dive into new proposals in the areas of cardiovascular imaging, diagnostic processes, and disease management. Particular attention will be paid to the implementation of artificial intelligence algorithms within these sectors in order to explore the potential future tools of cardiology.

Guest Editor

Dr. Filippo Toriello

About the Journal

Message from the Editor-in-Chief

Life (ISSN 2075-1729) is an international, peer-reviewed open access journal that publishes scientific studies related to fundamental themes in life sciences. Some papers are published individually, while others are submitted for inclusion in special issues with guest editors. You are invited to contribute a research article, essay, or a review to be considered for publication.

Editor-in-Chief

Prof. Dr. Lluís Ribas de Pouplana

Institute for Research in Biomedicine (IRB Barcelona), The Barcelona
Institute of Science and Technology, 08028 Barcelona, Spain

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Biology) / CiteScore - Q1 (Paleontology)
