Hepatobiliary and Pancreatic Surgery: New Trends and Solutions

Message from the Guest Editors

Hepatobiliary and pancreatic (HPB) diseases—both benign and malignant—represent a challenge in medicine. It is estimated that liver and pancreatic diseases, both malignant and benign, will increase their incidence in the coming decades. The aggressive behavior of HPB malignancies and the often-advanced stages at diagnosis are the main causes for the high mortality rate of these patients. On the other end, benign conditions such as chronic pancreatitis or liver cirrhosis are associated with an increased risk of developing cancer and may require aggressive treatments themselves (e.g., liver transplantation). However, in recent years, several advances have been made in the management of this group of diseases. Improvements in surgical technique, targeted chemo- and radiotherapy, and radiological and endoscopic tools are at the backbone of future research endeavors in the HPB field. We invite surgeons, oncologist, gastroenterologists, and all the physicians involved in the treatments of HPB diseases to collaborate in this Special Issue, sending us their most valuable scientific contributions.

About the Journal

Message from the Editor-in-Chief

Life (ISSN 2075-1729) is an international, peer-reviewed open access journal that publishes scientific studies related to fundamental themes in life sciences. Some papers are published individually, while others are submitted for inclusion in special issues with guest editors. You are invited to contribute a research article, essay, or a review to be considered for publication.

Editor-in-Chief

Prof. Dr. Lluís Ribas de Pouplana

Institute for Research in Biomedicine (IRB Barcelona), The Barcelona
Institute of Science and Technology, 08028 Barcelona, Spain

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Biology) / CiteScore - Q1 (Paleontology)
