# Coagulation and Its Disorders: Physiology and Pathological Mechanisms

### Message from the Guest Editor

This Special Issue aims to collect the most recent knowledge in the field, accepting research articles and reviews related to physiology and pathological mechanisms of coagulation disorders. Topics include, but are not limited to, the following:

- Original research articles and reviews on the physiology of coagulation
- Studies on genetic and functional defects of coagulation factors
- Infectious and inflammatory diseases impact on coagulation and molecular mechanisms
- Examination of organ failure-related coagulation disorders
- Research on the pathogenesis of severe coagulation disorders such as DIC

## About the Journal

### Message from the Editor-in-Chief

*Life* (ISSN 2075-1729) is an international, peer-reviewed open access journal that publishes scientific studies related to fundamental themes in life sciences. Some papers are published individually, while others are submitted for inclusion in special issues with guest editors. You are invited to contribute a research article, essay, or a review to be considered for publication.
