Pathogenic Mechanisms, Diagnosis, and Treatment of Hypertension: Insights and Implications

Message from the Guest Editors

More than one billion people worldwide suffer from hypertension, a leading cause of cardiovascular disease and the primary risk factor for cardiovascular mortality. The pathogenesis of hypertension involves an intricate interplay among various systemic regulations within the body, including the renin–angiotensin–aldosterone system (RAAS), vasculature system, renal sodium–fluid regulation system, sympathetic nervous system, metabolic regulation system, immune system, genetic factors, lifestyle factors, and more. This multidimensional perspective highlights the urgency for comprehensive research aimed at unraveling the complexities of hypertension's mechanisms. Efforts in this direction are essential for the development of advanced diagnostic tools and therapeutic interventions that can effectively address this widespread health challenge. In light of these imperative research needs, we cordially invite the submission of research and review papers contributing to our understanding of hypertension's pathogenesis and proposing innovative solutions for its diagnosis and treatment.

About the Journal

Message from the Editor-in-Chief

Life (ISSN 2075-1729) is an international, peer-reviewed open access journal that publishes scientific studies related to fundamental themes in life sciences. Some papers are published individually, while others are submitted for inclusion in special issues with guest editors. You are invited to contribute a research article, essay, or a review to be considered for publication.

Editor-in-Chief

Prof. Dr. Lluís Ribas de Pouplana

Institute for Research in Biomedicine (IRB Barcelona), The Barcelona
Institute of Science and Technology, 08028 Barcelona, Spain

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Biology) / CiteScore - Q1 (Paleontology)
