Clinical Research in Male Reproduction

Message from the Guest Editors

Infertility is a major public health problem that has become increasingly important in recent years, with the World Health Organization estimating that it affects one in six couples. In 50% of cases, a male factor is the cause of this condition; however, even today, it is not possible to identify the cause in approximately half of cases, falling under the definition of idiopathic infertility. This Special Issue aims to analyze the main issues involved in the field of male reproduction that still require careful evaluation by the scientific community. New research insights into this topic and the identification of possible future directions of study are needed to improve current understanding on the relevant pathogenesis and therapeutic management of this topic.

Guest Editors

Dr. Andrea Crafa

About the Journal

Message from the Editor-in-Chief

Life (ISSN 2075-1729) is an international, peer-reviewed open access journal that publishes scientific studies related to fundamental themes in life sciences. Some papers are published individually, while others are submitted for inclusion in special issues with guest editors. You are invited to contribute a research article, essay, or a review to be considered for publication.

Editor-in-Chief

Prof. Dr. Lluís Ribas de Pouplana

Institute for Research in Biomedicine (IRB Barcelona), The Barcelona
Institute of Science and Technology, 08028 Barcelona, Spain

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Biology) / CiteScore - Q1 (Paleontology)
