Technical Innovations in Transcranial Electrical Stimulation

Message from the Guest Editors

Overall, recent advances in tES have the potential to substantially contribute to both basic and translational human neuroscience, including the treatment of neurological and psychiatric disorders. However, more research is needed to fully understand the underlying mechanisms of tES and to optimize its use in different populations. In this Special Issue, we specifically want to highlight recent technical innovations involving tES, and will be accepting both original research and review contributions.

Guest Editors

Dr. Alexander Hunold

Technische Universität Ilmenau, Ehrenbergstraße 29, 98693 Ilmenau, Germany

Prof. Dr. Marcus Meinzer

Director of the Cognition, Aging, and Brain Stimulation Lab, Department of Neurology, University Medicine Greifswald, Greifswald, Germany

Deadline for manuscript submissions

closed (31 December 2024)

About the Journal

Message from the Editor-in-Chief

Life (ISSN 2075-1729) is an international, peer-reviewed open access journal that publishes scientific studies related to fundamental themes in life sciences. Some papers are published individually, while others are submitted for inclusion in special issues with guest editors. You are invited to contribute a research article, essay, or a review to be considered for publication.

Editor-in-Chief

Prof. Dr. Lluís Ribas de Pouplana

Institute for Research in Biomedicine (IRB Barcelona), The Barcelona
Institute of Science and Technology, 08028 Barcelona, Spain

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Biology) / CiteScore - Q1 (Paleontology)
