Multimodality Imaging in Current Cardiology

Message from the Guest Editor

In the current era, multimodality imaging represents a key strategy for the diagnosis and management of several cardiovascular diseases. It includes especially non-invasive imaging techniques such as echocardiography, cardiac computed tomography and cardiac magnetic resonance. The integration of information derived from these different exams allows for an in-deep analysis of the disease and consequently the choice of the best management strategies for patients. Several cardiovascular diseases require multimodality imaging: valvular heart diseases, cardiomyopathies, ischemic heart disease, and congenital disorders. The target of this Special Issue is cardiologists and radiologists who deal with cardiac imaging but also clinicians who need to be confident with these new technologies.

About the Journal

Message from the Editor-in-Chief

Life (ISSN 2075-1729) is an international, peer-reviewed open access journal that publishes scientific studies related to fundamental themes in life sciences. Some papers are published individually, while others are submitted for inclusion in special issues with guest editors. You are invited to contribute a research article, essay, or a review to be considered for publication.

Editor-in-Chief

Prof. Dr. Lluís Ribas de Pouplana

Institute for Research in Biomedicine (IRB Barcelona), The Barcelona
Institute of Science and Technology, 08028 Barcelona, Spain

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Biology) / CiteScore - Q1 (Paleontology)
