An Integrated Approach on Diagnosis and Treatment of Cerebral Veins and Intracranial Dural Sinuses Thrombosis (CVT)

Message from the Guest Editors

Cerebral veins and intracranial dural sinuses thrombosis (CVT) is a rare disease in the general population. At least one risk factor can be identified in about 85% of CVT patients. This Special Issue of *Life* (IF=3.2), **Journal Rank:** JCR - Q1 (Biology) includes the following topics: epidemiology, risk factors, pathophysiology, clinical presentation, laboratory testing, and the imaging of CVT. The treatment of CVT represents another important aspect: acute-phase therapy, management after the acute phase, and prognosis. We are pleased to invite you to submit a manuscript covering clinical research, as well as systematic reviews and meta-analyses. Accepted papers will be published continuously in the journal (as soon as accepted) and will be listed together on the Special Issue's website.

About the Journal

Message from the Editor-in-Chief

Life (ISSN 2075-1729) is an international, peer-reviewed open access journal that publishes scientific studies related to fundamental themes in life sciences. Some papers are published individually, while others are submitted for inclusion in special issues with guest editors. You are invited to contribute a research article, essay, or a review to be considered for publication.

Editor-in-Chief

Prof. Dr. Lluís Ribas de Pouplana

Institute for Research in Biomedicine (IRB Barcelona), The Barcelona
Institute of Science and Technology, 08028 Barcelona, Spain

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Biology) / CiteScore - Q1 (Paleontology)
