Application of Mass Spectrometry-Based Multi-Omics in Biomedical Research

Message from the Guest Editors

Mass spectrometry (MS) has long been a cornerstone of molecular analysis, but its full potential is now being realized through integrated, multi-omics strategies that combine proteomics, metabolomics, lipidomics, and mass spectrometry imaging (MSI).

This Special Issue seeks research articles, reviews, and technical advances that leverage MS-based multi-omics in biomedical research. Submissions may include the following:

- Integrated omics workflows combining two or more MS-based modalities;

- Spatial multi-omics and MSI applications in disease biology or drug delivery;

- Novel sample preparation, acquisition strategies, or data analysis pipelines;

- Translational studies identifying biomarkers or therapeutic targets;

- Computational and statistical methods for multi-omics data integration.

By bringing together leaders across analytical chemistry, bioinformatics, and translational science, this Special Issue aims to highlight innovations that expand the capabilities and impact of MS-based multi-omics in modern biomedical research.

Guest Editors

Prof. Dr. Young Ah Goo

Mass Spectrometry Technology Access Center at McDonnell Genome Institute (MTAC@MGI), Washington University in Saint Louis School of Medicine, St. Louis, MO, USA

Dr. Byoung-Kyu Cho

Department of Biochemistry and Molecular Biophysics, Washington University School of Medicine, St. Louis, MO, USA

Deadline for manuscript submissions

26 June 2026

About the Journal

Message from the Editor-in-Chief

Life (ISSN 2075-1729) is an international, peer-reviewed open access journal that publishes scientific studies related to fundamental themes in life sciences. Some papers are published individually, while others are submitted for inclusion in special issues with guest editors. You are invited to contribute a research article, essay, or a review to be considered for publication.

Editor-in-Chief

Prof. Dr. Lluís Ribas de Pouplana

Institute for Research in Biomedicine (IRB Barcelona), The Barcelona
Institute of Science and Technology, 08028 Barcelona, Spain

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Biology) / CiteScore - Q1 (Paleontology)
