Towards Personalized Medicine for Obstructive Sleep Apnea

Message from the Guest Editors

Obstructive sleep apnea (OSA) is a highly prevalent disease, associated with multiple comorbidities. While OSA is defined as the repetitive closure or narrowing of the upper airway, the exact mechanisms of this disorder in each individual patient remain unknown. However, it has been shown that underlying differences in OSA mechanisms can affect treatment outcomes. Indeed, endotypes such as the site of upper airway collapse, pathophysiology or health parameters such as BMI and comorbidities were found to be associated with one or more OSA treatment outcomes or adherence.

This *Life* Special Issue, "Towards Precision Medicine for Obstructive Sleep Apnea", will collect manuscripts on original data and reviews covering this topic. The scope covers novel findings in predictors for OSA treatment, based on endotyping, cardiovascular parameters, biomarkers, etc. but also welcomes fundamental research on OSA mechanisms and reviews. As such, we aim to provide a broad overview of fundamental OSA mechanisms and how these could be used as the next steps towards personalized medicine.

About the Journal

Message from the Editor-in-Chief

Life (ISSN 2075-1729) is an international, peer-reviewed open access journal that publishes scientific studies related to fundamental themes in life sciences. Some papers are published individually, while others are submitted for inclusion in special issues with guest editors. You are invited to contribute a research article, essay, or a review to be considered for publication.

Editor-in-Chief

Prof. Dr. Lluís Ribas de Pouplana

Institute for Research in Biomedicine (IRB Barcelona), The Barcelona
Institute of Science and Technology, 08028 Barcelona, Spain

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Biology) / CiteScore - Q1 (Paleontology)
