

Special Issue

Advances in Cardiac Arrest: Prognostic Performance and Management

Message from the Guest Editor

This Special Issue aims to serve as a seminal resource for medical professionals navigating the evolving landscape of cardiac arrest care. Despite advancements in resuscitative science, cardiac arrest continues to be a leading cause of mortality and morbidity around the world. This Special Issue seeks to address this critical gap by focusing on two pivotal aspects: prognostic performance and management strategies. It aims to elucidate the latest predictive models and biomarkers that can accurately forecast patient outcomes following resuscitation. Concurrently, this Special Issue will explore innovative management approaches, from pre-hospital interventions to advanced critical care techniques, that optimize patient survival and neurological function. By amalgamating cutting-edge research and expert opinions, this Special Issue endeavors to enhance clinical decision-making and set new benchmarks in cardiac arrest care.

About the Journal

Message from the Editor-in-Chief

Life (ISSN 2075-1729) is an international, peer-reviewed open access journal that publishes scientific studies related to fundamental themes in life sciences. Some papers are published individually, while others are submitted for inclusion in special issues with guest editors. You are invited to contribute a research article, essay, or a review to be considered for publication.

Editor-in-Chief

Prof. Dr. Lluís Ribas de Pouplana

Institute for Research in Biomedicine (IRB Barcelona), The Barcelona
Institute of Science and Technology, 08028 Barcelona, Spain

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Biology) / CiteScore - Q1 (Paleontology)
