New Radiological, Electrocardiographic and Biochemical Cardiovascular Risk Factors

Message from the Guest Editors

Cardiovascular disease is the leading cause of death worldwide. According to the latest statistics on the structure of deaths in the world, in 2016, cardiovascular diseases were the main cause of death (34.2% of all recorded deaths). Moreover, diseases of the cardiovascular system are characterized by a rapid increase in epidemiological importance, practically since the 1950s, which was partially stopped at the turn of the 20th and 21st centuries. Radiology and imaging diagnostics, electrophysiology, and biochemistry are currently recognized diagnostic methods of cardiovascular diseases. They have experienced a further increase in clinical importance in recent years. It is already impossible to imagine modern medicine without the aforementioned diagnostic methods, and the perspective of the next few years will only strengthen this tendency. We invite you to publish original and review papers as well as interesting case reports on the significance and predictive value of new radiological, electrocardiographic, and biochemical risk factors for cardiovascular diseases.

About the Journal

Message from the Editor-in-Chief

Life (ISSN 2075-1729) is an international, peer-reviewed open access journal that publishes scientific studies related to fundamental themes in life sciences. Some papers are published individually, while others are submitted for inclusion in special issues with guest editors. You are invited to contribute a research article, essay, or a review to be considered for publication.

Editor-in-Chief

Prof. Dr. Lluís Ribas de Pouplana

Institute for Research in Biomedicine (IRB Barcelona), The Barcelona
Institute of Science and Technology, 08028 Barcelona, Spain

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Biology) / CiteScore - Q1 (Paleontology)
