The Tiny Wonders in Drug Discovery: A Small Step for Microbes, One Giant Leap for Mankind

Message from the Guest Editors

Although tiny, microorganisms are living things that are ubiquitous in different environments and essential to supporting other life forms on Earth. Accompanied by the advancement in molecular techniques and pharmaceutical technology, researchers can now decipher the genetic codes of various microorganisms and perform genome mining to hunt for biosynthetic genes that could be exploited for the production and isolation of valuable pharmaceutical products. These innovations further hasten the drug discovery process and development of therapeutic drugs to treat various human ailments. A dysbiosis or imbalance in the human microbiome is associated with the development of human diseases, including metabolic diseases, cancer, allergies and so on.

This Special Issue aims to gather recent developments in the search of bioactive microbes derived from different habitats (i.e., terrestrial, ocean, mangrove forests), particularly the mechanisms by which these microbes confer beneficial effects in mankind. We especially seek manuscript submissions in original research reports and critical narrative or systematic reviews.

Guest Editors

Dr. Hooi-Leng Ser
Dr. Bey-Hing Goh
Dr. Matthew Donadu

Deadline for manuscript submissions

About the Journal

Message from the Editor-in-Chief

Life (ISSN 2075-1729) is an international, peer-reviewed open access journal that publishes scientific studies related to fundamental themes in life sciences. Some papers are published individually, while others are submitted for inclusion in special issues with guest editors. You are invited to contribute a research article, essay, or a review to be considered for publication.

Editor-in-Chief

Prof. Dr. Lluís Ribas de Pouplana

Institute for Research in Biomedicine (IRB Barcelona), The Barcelona
Institute of Science and Technology, 08028 Barcelona, Spain

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Biology) / CiteScore - Q1 (Paleontology)
