Diagnosis, Treatment and Prognosis of Prostate Cancer

Message from the Guest Editors

Prostate cancer is the most common non-skin cancer in men and the second leading cause of cancer-related deaths among men worldwide. The understanding and management of prostate cancer have evolved significantly over the past few decades. Early detection through PSA (prostate-specific antigen) testing has transformed the landscape of prostate cancer diagnosis, allowing for earlier and more effective intervention. However, challenges remain in differentiating between indolent and aggressive forms of the disease, leading to a need for more precise diagnostic tools and treatment strategies. Treatment approaches have diversified, ranging from active surveillance for low-risk cases to advanced therapies such as targeted therapy, immunotherapy, and robotic-assisted surgery for high-risk and metastatic prostate cancer. The focus on prognosis has also intensified, with ongoing research into biomarkers and genetic profiling aiming to predict disease progression more accurately and tailor treatment to individual patients.

The aim of this Special Issue is to compile the latest research and expert reviews on the diagnosis, treatment, and prognosis of prostate cancer.

About the Journal

Message from the Editor-in-Chief

Life (ISSN 2075-1729) is an international, peer-reviewed open access journal that publishes scientific studies related to fundamental themes in life sciences. Some papers are published individually, while others are submitted for inclusion in special issues with guest editors. You are invited to contribute a research article, essay, or a review to be considered for publication.

Editor-in-Chief

Prof. Dr. Lluís Ribas de Pouplana

Institute for Research in Biomedicine (IRB Barcelona), The Barcelona
Institute of Science and Technology, 08028 Barcelona, Spain

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Biology) / CiteScore - Q1 (Paleontology)
