

## Special Issue

# Therapeutic Effects of Natural Products on Human Diseases—3rd Edition

### Message from the Guest Editor

Natural products are compounds or substances produced by the living organisms found in nature. Since natural sources are considered potential resources for the development of lead compounds in drug discovery, a significant number of studies have focused on finding new therapeutic effects of natural products on human diseases, such as cancer, neurodegenerative diseases, immunological disorders, and metabolic diseases. This Special Issue of *Life*, entitled “Therapeutic Effects of Natural Products on Human Diseases—3rd Edition”, welcomes submissions of either research manuscripts or scientific reviews covering the therapeutic effects of various natural products (plants, microorganisms, algae, foods, animals, etc.) on human diseases. In particular, we are keen to publish mechanistic studies, evaluated by in vitro and/or in vivo experiments, to identify major molecules and/or cellular pathways of the targeted therapeutic action of natural compounds.

---

### Guest Editor

Prof. Dr. Seung Ho Lee

Department of Nano-Bioengineering, Incheon National University,  
Incheon, Republic of Korea

---

### Deadline for manuscript submissions

30 July 2026

## About the Journal

### Message from the Editor-in-Chief

*Life* (ISSN 2075-1729) is an international, peer-reviewed open access journal that publishes scientific studies related to fundamental themes in life sciences. Some papers are published individually, while others are submitted for inclusion in special issues with guest editors. You are invited to contribute a research article, essay, or a review to be considered for publication.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, CAPIus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q1 (Biology) / CiteScore - Q1 (Paleontology)
