Current Research on Dermatology: Pathology, Clinical Manifestation, Investigation and Therapy

Message from the Guest Editor

Considering recent advances in the field, dermatovenerology has proven to be a specialty of clinical, investigative, and therapeutic interest. Many diseases thought to be localized to the skin are now considered to be systemically involved in other areas. Cutaneous skin diseases vary in appearance, evolution, and prognosis as well as in their response to various treatments. The management of skin disease comorbidities requires interdisciplinary collaboration among medical and surgical specialties. Novel treatments are now available for various skin conditions, including surgical, cosmetic, and physiotherapeutic procedures. The new perspectives offered by translational medicine and research on the microbiome, endosymbionts, inflammatory molecules, diagnostics, treatments, and observations of comorbidities, complications, and their management are improving the standard of skin care, placing it in the context of personalized medicine and care. This Special Issue will collect and present data on the latest developments in the field. Submissions received before 24 June 2022 may receive a 20% discount.

Guest Editor

Prof. Dr. Alin Laurentiu Tatu

1. Clinical Department, Dermatology, Faculty of Medicine and Pharmacy, Dunarea de Jos University, Galati, Romania
2. Dermatology Department, Saint Parascheva Clinical Hospital of Infectious Diseases, Galati, Romania
3. Multidisciplinary Integrative Center for Dermatological Interface Research, Galati, Romania

About the Journal

Message from the Editor-in-Chief

Life (ISSN 2075-1729) is an international, peer-reviewed open access journal that publishes scientific studies related to fundamental themes in life sciences. Some papers are published individually, while others are submitted for inclusion in special issues with guest editors. You are invited to contribute a research article, essay, or a review to be considered for publication.

Editor-in-Chief

Prof. Dr. Lluís Ribas de Pouplana

Institute for Research in Biomedicine (IRB Barcelona), The Barcelona
Institute of Science and Technology, 08028 Barcelona, Spain

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Biology) / CiteScore - Q1 (Paleontology)
