

Special Issue

Diabetes Metabolism: Molecular and Integrative Approaches

Message from the Guest Editors

Dear Colleague, This Special Issue aims to collect cutting-edge research in molecular, high-precision, and computational diabetology. The topics of the Special Issue will cover molecular mechanisms underlying the development of diabetes, including insulin resistance and pancreas, liver, muscle and adipose tissue functions; pathophysiology of diabetes complications; omics data, bioinformatics and artificial intelligence in diabetes research; and new molecular targets and biomarkers for diabetes care. Original articles and comprehensive reviews from researchers and multidisciplinary teams involved in the study of molecular, evolutionary, and computational aspects of diabetes and its complications are welcome.

Guest Editors

Prof. Dr. Vadim Klimontov
Dr. Olga Pivovarova-Ramich
Dr. Olga Saik

Deadline for manuscript submissions

closed (15 December 2022)

About the Journal

Message from the Editor-in-Chief

Life (ISSN 2075-1729) is an international, peer-reviewed open access journal that publishes scientific studies related to fundamental themes in life sciences. Some papers are published individually, while others are submitted for inclusion in special issues with guest editors. You are invited to contribute a research article, essay, or a review to be considered for publication.

Editor-in-Chief

Prof. Dr. Lluís Ribas de Pouplana

Institute for Research in Biomedicine (IRB Barcelona), The Barcelona
Institute of Science and Technology, 08028 Barcelona, Spain

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Biology) / CiteScore - Q1 (Paleontology)
