Revolutionizing Drug Delivery: Innovations in Targeted Therapeutic Nanocarriers

Message from the Guest Editor

Targeted therapeutic nanocarriers have garnered significant attention due to their potential to revolutionize drug delivery. The primary objective is to enhance the precision and efficacy of drug administration while minimizing adverse effects.

However, several key challenges persist:

- **Nanocarrier Design:** Cutting-edge materials and designs are transforming therapeutic delivery. What are the pivotal innovations in this sector?
- **Drug Loading & Release:** Smart strategies for effective drug loading and release are reshaping therapy. How can we refine these for better patient outcomes?
- **Therapeutic Applications:** Nanocarriers have broad utility, from oncology to neurodegenerative diseases. What new areas are ripe for exploration?
- **Safety & Regulations:** Bridging lab innovation with clinical application requires focus on safety and compliance. What strategies can ensure this?

We invite contributions from esteemed researchers, scientists, and innovators that share their insights and findings.

About the Journal

Message from the Editor-in-Chief

Life (ISSN 2075-1729) is an international, peer-reviewed open access journal that publishes scientific studies related to fundamental themes in life sciences. Some papers are published individually, while others are submitted for inclusion in special issues with guest editors. You are invited to contribute a research article, essay, or a review to be considered for publication.

Editor-in-Chief

Prof. Dr. Lluís Ribas de Pouplana

Institute for Research in Biomedicine (IRB Barcelona), The Barcelona
Institute of Science and Technology, 08028 Barcelona, Spain

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Biology) / CiteScore - Q1 (Paleontology)
