Cardiorenal Disease: Pathogenesis, Diagnosis, and Treatments

Message from the Guest Editors

Chronic kidney disease and heart failure are among the most prevalent comorbidities worldwide, significantly impacting patients' quality of life and survival. These conditions often coexist, creating a bidirectional and deleterious interplay referred to as cardiorenal syndrome (CRS), where one condition accelerates the development and progression of the other. The diagnosis of CRS is associated with high rates of hospital readmissions, progressive clinical deterioration, and increased morbidity and mortality. This poses significant challenges for healthcare systems due to the high care burden and resource consumption. Despite recent therapeutic advancements, treatment implementation remains suboptimal, largely due to the lack of robust evidence and concerns about iatrogenic complications. This Special Issue aims to advance the management of cardiorenal syndrome by promoting a multidisciplinary approach focused on developing new diagnostic tools to improve characterization and innovative therapeutic strategies to enhance patient outcomes.

Guest Editors

Dr. Pedro Caravaca-Pérez

About the Journal

Message from the Editor-in-Chief

Life (ISSN 2075-1729) is an international, peer-reviewed open access journal that publishes scientific studies related to fundamental themes in life sciences. Some papers are published individually, while others are submitted for inclusion in special issues with guest editors. You are invited to contribute a research article, essay, or a review to be considered for publication.

Editor-in-Chief

Prof. Dr. Lluís Ribas de Pouplana

Institute for Research in Biomedicine (IRB Barcelona), The Barcelona
Institute of Science and Technology, 08028 Barcelona, Spain

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Biology) / CiteScore - Q1 (Paleontology)
