Mechanism, Diagnosis and Treatment of ENT Diseases: Otological and Sinus Disorders - Volume II

Message from the Guest Editors

According to the World Health Organization, around 466 million people all over the world experience hearing loss caused by various factors; therefore, proper diagnosis, treatment, and rehabilitation of ENT diseases are extremely important to help patients to hear and live better. The first volume of this Special Issue was a great success. Now, we invite you to publish in the second volume.

(https://www.mdpi.com/journal/life/special_issues/ENT_diseases_otology_rhinology) The main aims of the Special Issue are to share knowledge and current studies of mechanisms of ENT diseases and share personal experiences, current strategies, and future perspectives and expectations in the diagnostic process and treatment of most common otorhinolaryngological diseases, especially in the field of otology and rhinology.
