Promise of Natural Products and Their Derivatives in Diabetes and Its Complications: Present and Future Prospect

Message from the Guest Editors

Though there has been substantial advancement in modern science, including synthetic chemistry, however, yet natural products originated from terrestrial or marine sources have been contributing a lot to disease management and irradiation of many diseases including diabetes mellitus. On the other hand, still diabetes mellitus and its complications are expensive to manage with currently available drugs. In the past few decades extensive research has been conducted on natural products and their derivatives in search of antidiabetic drugs or ways to minimize its complications. In search for new antidiabetic drugs, new dimensions in research such as network pharmacology, genomic, nutrigenetics, metabolomics, or in silico studies on antidiabetic metabolites could be remarkably interesting and promising. In the upcoming era, some interesting new sources and targets should be tested and potential interaction and possible incompatibilities of antidiabetic agents with clinically used drugs are needed to be reported.

About the Journal

Message from the Editor-in-Chief

Life (ISSN 2075-1729) is an international, peer-reviewed open access journal that publishes scientific studies related to fundamental themes in life sciences. Some papers are published individually, while others are submitted for inclusion in special issues with guest editors. You are invited to contribute a research article, essay, or a review to be considered for publication.

Editor-in-Chief

Prof. Dr. Lluís Ribas de Pouplana

Institute for Research in Biomedicine (IRB Barcelona), The Barcelona
Institute of Science and Technology, 08028 Barcelona, Spain

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Biology) / CiteScore - Q1 (Paleontology)
