Trends and Outlooks in Ecological Research: The Use of Physiological Biomarkers in Wildlife and Applied Ecology

Message from the Guest Editors

This Special Issue, edited by and , will focus on the identification of physiological biomarkers for use in wildlife and how such information can better our understanding of biological mechanisms and physiological responses to environmental challenges. A broad range of taxa including birds, mammals, insects and fish as well as a broad range of physiological biomarkers including changes in glucocorticoid stress responses, immunity, neurobiology, metabolic parameters, and nutritional physiology will be covered in this Special Issue. Advances in this multidisciplinary field of study will be presented by promoting the exchange of ideas between researchers working at different levels of study (e.g., individual, population, and ecosystem) and in different fields of study (e.g., genomics, endocrinology, landscape ecology).

This Special Issue will also highlight areas where future research is needed and provide the framework for ecologists and biologists to further the use of physiological biomarkers in wildlife and applied ecological studies.

Guest Editors

Dr. Michael Sheriff

About the Journal

Message from the Editor-in-Chief

Life (ISSN 2075-1729) is an international, peer-reviewed open access journal that publishes scientific studies related to fundamental themes in life sciences. Some papers are published individually, while others are submitted for inclusion in special issues with guest editors. You are invited to contribute a research article, essay, or a review to be considered for publication.

Editor-in-Chief

Prof. Dr. Lluís Ribas de Pouplana

Institute for Research in Biomedicine (IRB Barcelona), The Barcelona
Institute of Science and Technology, 08028 Barcelona, Spain

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Biology) / CiteScore - Q1 (Paleontology)
