

## Special Issue

# Human Infertility and Reproductive Endocrinology: 2nd Edition

### Message from the Guest Editor

The second volume of this Special Issue follows on from the success of the first. We invite you to publish your research in this edition of “**Human Infertility and Reproductive Endocrinology**”

([https://www.mdpi.com/journal/life/special\\_issues/6R8KIXVW2L](https://www.mdpi.com/journal/life/special_issues/6R8KIXVW2L)).

Infertility is a common clinical problem, affecting 13% to 15% of couples worldwide. In addition, infertility is considered a public problem, not only affecting couples' lives, but also healthcare services and the social environment. The male factor is solely responsible for about 20% of infertile couples and contributory to another 30–40%. The female factor is responsible, solely or associated with the male factor, for about 50% of the cases. This Special Issue will focus on human fertility and infertility, both at the molecular and clinical levels, including the hormonal regulation of male and female fertility, diagnosis and treatment of diseases causing infertility, and the clinical management of infertile couples.

## About the Journal

### Message from the Editor-in-Chief

*Life* (ISSN 2075-1729) is an international, peer-reviewed open access journal that publishes scientific studies related to fundamental themes in life sciences. Some papers are published individually, while others are submitted for inclusion in special issues with guest editors. You are invited to contribute a research article, essay, or a review to be considered for publication.
