

## Special Issue

# Gender Medicine: Are Gender Differences Important for Medicine?

### Message from the Guest Editor

Medicine can be prescribed based on gender to account for differences in epidemiology, symptomatology, and treatment for different diseases. In this regard, for example, the literature on the COVID-19 pandemic described that older men with comorbidities had higher mortality rates than female subjects. Furthermore, aside from age and comorbidities, sex and gender differences were found to influence the management of diseases. The objective of this Special Issue is to contribute to the literature on the study of gender/sex differences in pathology and management for diseases.

## About the Journal

### Message from the Editor-in-Chief

*Life* (ISSN 2075-1729) is an international, peer-reviewed open access journal that publishes scientific studies related to fundamental themes in life sciences. Some papers are published individually, while others are submitted for inclusion in special issues with guest editors. You are invited to contribute a research article, essay, or a review to be considered for publication.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, CAPIus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q1 (Biology) / CiteScore - Q1 (Paleontology)
