Exploration of the Unmet Needs of Aging People Living with HIV

Message from the Guest Editors

The advent of easier-to-access, tolerable, and conveniently dosed antiretroviral therapy enhances the ability of people living with HIV (PLWH) to experience a long life. However, aging PLWH face new challenges, including the management of HIV-associated, non-AIDS co-morbidities, including geriatric syndromes, social isolation, mental health concerns, and ongoing substance use. In turn, these conditions, combined with social disparities of health, including intersecting stigmas and poverty, contribute to impaired physical, mental, and cognitive function. This special edition will highlight these highly prevalent and relevant topics with a specific focus on areas prioritized by aging PLWH and work involving community-based participatory research.

About the Journal

Message from the Editor-in-Chief

Life (ISSN 2075-1729) is an international, peer-reviewed open access journal that publishes scientific studies related to fundamental themes in life sciences. Some papers are published individually, while others are submitted for inclusion in special issues with guest editors. You are invited to contribute a research article, essay, or a review to be considered for publication.

Editor-in-Chief

Prof. Dr. Lluís Ribas de Pouplana

Institute for Research in Biomedicine (IRB Barcelona), The Barcelona
Institute of Science and Technology, 08028 Barcelona, Spain

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Biology) / CiteScore - Q1 (Paleontology)
