

Special Issue

Genomics and Epigenomics of Human Complex Diseases

Message from the Guest Editors

The knowledge on genomics has widened enormously in the last decade, enabling a better understanding of human diseases. This Special Issue will provide readers with cutting-edge knowledge on “Genomics and Epigenomics of Human Complex Diseases”. In particular, we aim to collect original research papers and reviews on the genomic and epigenomic profiling of complex conditions, and we will especially welcome studies integrating different OMICs and trying to go beyond traditional analytical pipelines. In this sense, purely bioinformatics work and innovative reanalysis and reinterpretation of published data will also be considered for publication, with particular emphasis on papers describing translational application to the clinic. Therefore, this collection of interdisciplinary papers about Genomics and Epigenomics of Human Complex Diseases will be a good reference for a broad range of readers, including geneticists, medical doctors, bench biologists, data analysts and genetic epidemiologists.

About the Journal

Message from the Editor-in-Chief

Life (ISSN 2075-1729) is an international, peer-reviewed open access journal that publishes scientific studies related to fundamental themes in life sciences. Some papers are published individually, while others are submitted for inclusion in special issues with guest editors. You are invited to contribute a research article, essay, or a review to be considered for publication.

Editor-in-Chief

Prof. Dr. Lluís Ribas de Pouplana

Institute for Research in Biomedicine (IRB Barcelona), The Barcelona
Institute of Science and Technology, 08028 Barcelona, Spain

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Biology) / CiteScore - Q1 (Paleontology)
