# Enhancements in Screening Pathways for Early Detection of Lung Cancer: Current Direction and Innovative Proposals

### Message from the Guest Editors

Historically, lung cancer has been an entity whose indolence in the early stages of the disease led to ominous prognoses at the time of diagnosis in advanced stages. Scientific and technological developments, multidisciplinary pathways, and the spread and greater accessibility of health care have substantially changed the earliness of diagnosis in this type of cancer. It seems clear in modern scientific evidence that major areas for improvement are still needed, but some directions for development appear to be defined. This Special Issue provides a compendium of current indications and the latest innovations that will significantly support the implementation of lung cancer screening programs, from diagnosis to surgery and therapy.

## About the Journal

### Message from the Editor-in-Chief

*Life* (ISSN 2075-1729) is an international, peer-reviewed open access journal that publishes scientific studies related to fundamental themes in life sciences. Some papers are published individually, while others are submitted for inclusion in special issues with guest editors. You are invited to contribute a research article, essay, or a review to be considered for publication.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, CAPIus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q1 (Biology) / CiteScore - Q1 (Paleontology)
