

## Special Issue

# Advances in Research on Motor Deficits Caused by Neurological Disorders: From Mechanism to Treatment

### Message from the Guest Editors

Motor deficits result from damage to motor skills due to various neurological disorders, including traumatic brain and spinal cord injuries, stroke, neurodegenerative diseases, and peripheral nerve injuries. These conditions significantly contribute to global mortality and present a wide range of symptoms, from complete paralysis to mild muscle weakness. The primary goal of managing motor deficits is to enhance motor skills, alleviate symptoms, and reintegrate individuals into their daily lives. However, effective treatments are hindered by a limited understanding of the underlying mechanisms and the complexity of different injuries, complicating accurate diagnosis and treatment plans. This Special Issue aims to deepen the understanding of these mechanisms by presenting updated preclinical and clinical research. Contributions are encouraged on new methods for evaluating and treating motor deficits across various neurological disorders. The knowledge gathered here seeks to establish guidelines for the rehabilitation of patients facing motor function challenges due to neurological conditions.

## About the Journal

### Message from the Editor-in-Chief

*Life* (ISSN 2075-1729) is an international, peer-reviewed open access journal that publishes scientific studies related to fundamental themes in life sciences. Some papers are published individually, while others are submitted for inclusion in special issues with guest editors. You are invited to contribute a research article, essay, or a review to be considered for publication.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, CAPIus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q1 (Biology) / CiteScore - Q1 (Paleontology)
