Special Issue

Microbial Biotechnology and Biomanufacturing

Message from the Guest Editors

The global society and economy are facing formidable challenges as climate change, environmental crises, and energy-resource shortages trigger profound transformations in the world's industrial landscape. Microbial biomanufacturing is poised to revolutionize alobal industrial paradiams across the chemical. pharmaceutical, and food sectors, thereby ushering in a new epoch of sustainable economic growth, characterized by its environmentally friendly nature, high efficiency, and renewable capabilities. This Special Issue will focus on microbial biotechnology and biomanufacturing for industrial microorganisms, exploring cutting-edge synthetic biology tools as well as sustainable biomanufacturing processes for future foods, pharmaceutical chemicals, bulk chemicals, highvalue-added plant natural products, and so on. Submissions including original research articles, reviews, perspectives, and short communications are welcome.

About the Journal

Message from the Editor-in-Chief

Life (ISSN 2075-1729) is an international, peer-reviewed open access journal that publishes scientific studies related to fundamental themes in life sciences. Some papers are published individually, while others are submitted for inclusion in special issues with guest editors. You are invited to contribute a research article, essay, or a review to be considered for publication.

Editor-in-Chief

Prof. Dr. Lluís Ribas de Pouplana Institute for Research in Biomedicine (IRB Barcelona), The Barcelona Institute of Science and Technology, 08028 Barcelona, Spain

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Biology) / CiteScore - Q1 (Paleontology)
