

Special Issue

From Stem Cells to Embryos, Congenital Anomalies and Epidemiology

Message from the Guest Editors

This special issue explores the dynamic intersection of stem cell research, embryonic development, congenital anomalies, and their relationship with epidemiological factors. Stem cells, with their transformative potential, and the pathways of differentiation are central to understanding the earliest stages of human development. By investigating the intricacies of how stem cells differentiate and give rise to various cell types, researchers gain insights into the origins of congenital anomalies. Moreover, this special issue delves into the epidemiological factors that influence the prevalence and distribution of these anomalies.

Guest Editors

Dr. Maria Eleni Manthou

Prof. Dr. Soultana Meditskou

Dr. Paschalis Theotokis

Deadline for manuscript submissions

30 March 2026

About the Journal

Message from the Editor-in-Chief

Life (ISSN 2075-1729) is an international, peer-reviewed open access journal that publishes scientific studies related to fundamental themes in life sciences. Some papers are published individually, while others are submitted for inclusion in special issues with guest editors. You are invited to contribute a research article, essay, or a review to be considered for publication.

Editor-in-Chief

Prof. Dr. Lluís Ribas de Pouplana

Institute for Research in Biomedicine (IRB Barcelona), The Barcelona
Institute of Science and Technology, 08028 Barcelona, Spain

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Biology) / CiteScore - Q1 (Paleontology)
