

## Special Issue

# Idiopathic Intracranial Hypertension

### Message from the Guest Editors

Idiopathic intracranial hypertension (IIH) is characterized by raised intracranial pressure (ICP) with no identifiable cause. There is a rising incidence and prevalence in this disease, and it appears that this is related to country-specific prevalence of obesity. It typically affects women of working age, and headache is the predominant morbidity in over 90%. Due to the nature of the disease, 10% have severe visual loss at presentation caused by papilledema, requiring neurosurgical intervention. The complexity of this disorder requires the expertise of a multiprofessional team to provide the best healthcare for these patients. This Special Issue aims to highlight research from this multiprofessional perspective within the neurosciences. In this Special Issue, "Idiopathic Intracranial Hypertension", the readership will find research that reflects the interplay between basic research and clinical neurology, ophthalmology, and neurosurgery professionals at the leading edge of this growing research field.

### Guest Editors

Dr. Steffen Hamann

Dr. Susan Mollan

Dr. Heather E. Moss

### Deadline for manuscript submissions

closed (31 July 2021)

## About the Journal

### Message from the Editor-in-Chief

*Life* (ISSN 2075-1729) is an international, peer-reviewed open access journal that publishes scientific studies related to fundamental themes in life sciences. Some papers are published individually, while others are submitted for inclusion in special issues with guest editors. You are invited to contribute a research article, essay, or a review to be considered for publication.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, CAPIus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q1 (Biology) / CiteScore - Q1 (Paleontology)
