The Interplay between Immune System and the Kidneys: Games without Frontiers?

Message from the Guest Editors

The Immune System (IS) and Kidney function are closely and interactively connected. Systemic Lupus Erythematosus, hepatitis B and C, solid organ malignancies, and hematological diseases are only a small example of the primary causes affecting kidneys through several immunological pathways. Our Special Issue of *Life* aims to elucidate the interaction between the IS and kidney disease in terms of the involvement of the IS in the pathogenesis and progress of glomerular diseases. We invite researchers to submit their work on the following subjects:

- Immune Mechanisms involved in systemic diseases, infections, and malignancies affecting the kidneys;
- Pathogenesis and Histology in primary and secondary glomerular and interstitial diseases;
- Complications of the innate and adaptive immunity in CKD and clinical complications, including cardiovascular disease, infections, and malignancies;
- The impact of renal transplantation in patients' immunological profile and outcome of graft function.

Guest Editors

About the Journal

Message from the Editor-in-Chief

Life (ISSN 2075-1729) is an international, peer-reviewed open access journal that publishes scientific studies related to fundamental themes in life sciences. Some papers are published individually, while others are submitted for inclusion in special issues with guest editors. You are invited to contribute a research article, essay, or a review to be considered for publication.

Editor-in-Chief

Prof. Dr. Lluís Ribas de Pouplana

Institute for Research in Biomedicine (IRB Barcelona), The Barcelona
Institute of Science and Technology, 08028 Barcelona, Spain

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Biology) / CiteScore - Q1 (Paleontology)
