

## Special Issue

# Current Advances in Interstitial Lung Diseases

### Message from the Guest Editors

Interstitial lung disease (ILDs) describes a heterogeneous group of diseases that are classified into subclasses based on similar radiographic or pathologic findings. International guidelines have been developed for the most common forms of ILDs, such as idiopathic pulmonary fibrosis (IPF), sarcoidosis, and hypersensitivity pneumonitis, and are regularly updated to ensure consistency in diagnosis and treatment. This Special Issue aims to provide up-to-date data by presenting research on ILDs and to provide a comprehensive collection of work performed by experts in the field, thus creating a valuable resource for ILD specialists worldwide. Submissions on the current state of the art as well as ongoing controversies related to the practice of ILDs are welcome.

We are inviting healthcare professionals and researchers involved in ILD patient care to submit original research articles, reviews, or observational studies to Life addressing topics relevant to this issue. Papers will undergo a thorough peer review by experts in the field.

## About the Journal

### Message from the Editor-in-Chief

*Life* (ISSN 2075-1729) is an international, peer-reviewed open access journal that publishes scientific studies related to fundamental themes in life sciences. Some papers are published individually, while others are submitted for inclusion in special issues with guest editors. You are invited to contribute a research article, essay, or a review to be considered for publication.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, CAPIus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q1 (Biology) / CiteScore - Q1 (Paleontology)
