Regulation of Abiotic Stress Resistance in Crops

Message from the Guest Editor

Abiotic stress, which includes drought, extreme temperature, salinity, and environmental pollution with heavy metals, results in the growth and yield loss of crops that threatens global food security. With the continued aggravation of climate change, it is crucial to develop multifaceted regulatory strategies to enhance the ability of crops to adapt to abiotic stress, including hormone modulation, plant enzymatic system activation, and stress gene expression. Thus, this Special Issue will not only focus on unravelling how crops react to abiotic stress at physiological, biochemical, and molecular (genetic, epigenetic, transcriptomic, and metabolomic) levels, but will also propose how to regulate the growth and yield formation of crops. The aim of this Special Issue, entitled “Regulation of Abiotic Stress Resistance in Crops”, is to highlight the mechanisms that control the growth and development of abiotic stress tolerance for the major crop species in the world. Through this, we will capture current and in-depth scientific knowledge on agronomic, morphological, physiological, biochemical, metabolomic, molecular, genomic, genetic, or epigenetic modifications.

About the Journal

Message from the Editor-in-Chief

Life (ISSN 2075-1729) is an international, peer-reviewed open access journal that publishes scientific studies related to fundamental themes in life sciences. Some papers are published individually, while others are submitted for inclusion in special issues with guest editors. You are invited to contribute a research article, essay, or a review to be considered for publication.

Editor-in-Chief

Prof. Dr. Lluís Ribas de Pouplana

Institute for Research in Biomedicine (IRB Barcelona), The Barcelona
Institute of Science and Technology, 08028 Barcelona, Spain

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Biology) / CiteScore - Q1 (Paleontology)
