

## Special Issue

# Cultivation and Regulation of Abiotic Stress for Field Crops

### Message from the Guest Editors

Plants are typically exposed to a broad myriad of abiotic stresses, including drought, salinity, heavy metal, and heat stress that can diminish the plant photosynthetic area and, thus, the total attained plant biomass or grain yield. In this context, the use of field crop species that can remain highly productive in environments with saline soils, recurrent drought periods, and various types of metal toxicity is an important strategy to cope with these predominant abiotic stresses in arid and semi-arid climates. Furthermore, globalization and industrialization are also factors that increase the levels of various toxic pollutants such as cadmium (Cd), copper (Cu), arsenic (As), mercury (Hg), and lead (Pb) in soil, which can pose serious threats not only to normal plant growth and development but also to human health. Therefore, we are in need of strategies that can increase plant growth and yield in environments of abiotic stress.

### Guest Editors

Dr. Muhammad Hamzah Saleem

College of Plant Science and Technology, Huazhong Agricultural University, Wuhan 430070, China

Dr. Aishah Alatawi

Biology Department, Faculty of Science, Tabuk University, Tabuk 71421, Saudi Arabia

### Deadline for manuscript submissions

closed (31 December 2022)

## About the Journal

### Message from the Editor-in-Chief

*Life* (ISSN 2075-1729) is an international, peer-reviewed open access journal that publishes scientific studies related to fundamental themes in life sciences. Some papers are published individually, while others are submitted for inclusion in special issues with guest editors. You are invited to contribute a research article, essay, or a review to be considered for publication.

### Editor-in-Chief

Prof. Dr. Lluís Ribas de Pouplana

Institute for Research in Biomedicine (IRB Barcelona), The Barcelona  
Institute of Science and Technology, 08028 Barcelona, Spain

---

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, CAPIus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q1 (Biology) / CiteScore - Q1 (Paleontology)
