Advances in Livestock and Human Parasites

Message from the Guest Editors

We aim to showcase the most recent advances in livestock parasitology. The term livestock here refers to all domesticated animals raised in an agricultural setting to produce labor and commodities, including ruminants (cattle, sheep, and goats), swine, horses, poultry, and fish. Studies on all aspects of parasitology and parasite biology will be considered, including those on biodiversity; life cycles; understanding host–parasite interactions using different approaches, such as immunology, genomics, and genetics; metagenomics and microbiome studies; cell and molecular biology; pathology; mechanisms of anthelmintic or drug resistance; parasite distribution shifts in the context of climate changes; novel therapeutics; alternative parasite control strategies; and vaccines.

About the Journal

Message from the Editor-in-Chief

Life (ISSN 2075-1729) is an international, peer-reviewed open access journal that publishes scientific studies related to fundamental themes in life sciences. Some papers are published individually, while others are submitted for inclusion in special issues with guest editors. You are invited to contribute a research article, essay, or a review to be considered for publication.

Editor-in-Chief

Prof. Dr. Lluís Ribas de Pouplana

Institute for Research in Biomedicine (IRB Barcelona), The Barcelona
Institute of Science and Technology, 08028 Barcelona, Spain

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Biology) / CiteScore - Q1 (Paleontology)
