Special Issue

Novel Horizons in the Lung Transplantation Field: Tomorrow Comes Today

Message from the Guest Editors

The aim of this Special Issue is to summarize the best evidence regarding the most recent advancements in the lung transplantation field. We are collecting the most significant findings in both research and clinical studies concerning lung transplantation. We will explore the current use of different ex vivo perfusion techniques. including their limitations and drawbacks, as well as experiences of prolonged preservation. We will discuss the current strategies for the expansion of the donor pool, including marginal donors and donors after cardiac death (DCD) programs, as well as their longterm outcomes. Due to recent successes in the field of xenotransplantation, we will assess in the current stateof-the-art this field and current research on artificial organs. We also would like to discuss the most promising and advanced treatments for chronic and acute rejection, immunosuppression protocols, and biomarkers for the evaluation of long-term outcomes. Another interesting topic to assess would be prophylaxis and treatment of infections related to MDR and atypical pathogens. The final part of the Special Issue will be dedicated to the role of LTX during the COVID-19 pandemic.

About the Journal

Message from the Editor-in-Chief

Life (ISSN 2075-1729) is an international, peer-reviewed open access journal that publishes scientific studies related to fundamental themes in life sciences. Some papers are published individually, while others are submitted for inclusion in special issues with guest editors. You are invited to contribute a research article, essay, or a review to be considered for publication.

Editor-in-Chief

Prof. Dr. Lluís Ribas de Pouplana

Institute for Research in Biomedicine (IRB Barcelona), The Barcelona Institute of Science and Technology, 08028 Barcelona, Spain

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Biology) / CiteScore - Q1 (Paleontology)
