The Materno-Fetal Outcome of Pregnancies in Chronic Diseases

Message from the Guest Editors

At their reproductive age, patients with chronic conditions have a higher risk of pregnancy complications, both maternal and fetal. Chronic illnesses and risk factors have been associated over time with maternal complications, gestational diabetes and pre-eclampsia (the latter being the most prevalent). Nevertheless, the extent of chronic diseases is vast, ranging from cardiovascular, endocrine, nutritional, neurologic, rheumatic, hematologic, nephrology, to ophthalmologic and even dermatologic conditions. The study of maternal and fetal outcomes of pregnancy in chronic diseases is of great importance in order to help our patients plan a pregnancy, better define medication compatibility, to have a favorable maternal and fetal outcome and also better understand the long-term effects on children.

The aim of this Special Issue is to better understand the complex situations that may arise during pregnancy in patients with chronic illnesses, to establish the most prevalent adverse pregnancy events and the transmissibility of certain diseases. We are delighted to invite you to submit your papers here.

About the Journal

Message from the Editor-in-Chief

Life (ISSN 2075-1729) is an international, peer-reviewed open access journal that publishes scientific studies related to fundamental themes in life sciences. Some papers are published individually, while others are submitted for inclusion in special issues with guest editors. You are invited to contribute a research article, essay, or a review to be considered for publication.

Editor-in-Chief

Prof. Dr. Lluís Ribas de Pouplana

Institute for Research in Biomedicine (IRB Barcelona), The Barcelona
Institute of Science and Technology, 08028 Barcelona, Spain

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Biology) / CiteScore - Q1 (Paleontology)
