Special Issue

Molecular Underpinnings of Cancer: Pathways to Targeted Therapy

Message from the Guest Editors

This Special Issue aims to advance our understanding of the molecular events governing cancer development and progression, providing a comprehensive platform of high-impact research. We welcome original articles, reviews, and perspectives covering a broad spectrum of topics, including (but not limited to) the following:

- Oncogenes and tumor suppressors.
- Epigenetic modifications and chromatin remodeling.
- Roles of non-coding RNAs in cancer.
- Tumor microenvironment interactions.
- Dysregulated signaling pathways.
- Cancer metabolism and metabolic reprogramming.
- Mechanisms of DNA damage and repair.
- Liquid biopsy biomarkers.
- Novel molecular targets for precision oncology.

By bringing together molecular biologists, oncologists, and translational researchers, this Special Issue seeks to foster multidisciplinary dialogue and innovative findings, potentially linking fundamental discoveries with clinical applications. Our ultimate goal is to provide both a resource and inspiration for advancing molecular oncology in the era of personalized medicine. We look forward to your valuable contribution and encourage you to submit your manuscript for consideration.

Guest Editors

Dr. Rahul Shivahare

Comprehensive Cancer Center, The Ohio State University, Columbus, OH, USA

Dr. Joon-Yong Chung

National Cancer Institute, Bethesda, MD, USA

Deadline for manuscript submissions

30 September 2026

About the Journal

Message from the Editor-in-Chief

Life (ISSN 2075-1729) is an international, peer-reviewed open access journal that publishes scientific studies related to fundamental themes in life sciences. Some papers are published individually, while others are submitted for inclusion in special issues with guest editors. You are invited to contribute a research article, essay, or a review to be considered for publication.

Editor-in-Chief

Prof. Dr. Lluís Ribas de Pouplana

Institute for Research in Biomedicine (IRB Barcelona), The Barcelona Institute of Science and Technology, 08028 Barcelona, Spain

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Biology) / CiteScore - Q1 (Paleontology)
