

Special Issue

Microalgae Metabolites

Message from the Guest Editors

Microalgae and their extracts represent a vast and unexplored source of compounds with biological activity. These compounds show nutraceutical, antimicrobial, anti-inflammatory, anti-aging, aggregative, vasoconstricting, hypocholesterolemic, antioxidant, immunosuppressive, photoprotective, and neurotransmitting activities. Although hundreds of these metabolites have been identified in cultures of photosynthetic microorganisms, the induction of synthesis is unknown in most cases, the separation and recovery of the compounds need to be optimized and, thus, their inclusion into commercial products awaits further research and development. Chemically, the compounds with biological activity can be grouped into proteins/enzymes, fatty acids, sterols, pigments, vitamins, alkaloids, mycosporine-like amino acids, and other compounds not fitting into these aforementioned categories. This Special Issue is dedicated to all aspects of the production of specialty chemicals from microalgae, covering the selecting of the species, the definition of the culture conditions, isolating and purifying the target molecule, and demonstration of the biological activity through clinical tests.

About the Journal

Message from the Editor-in-Chief

Life (ISSN 2075-1729) is an international, peer-reviewed open access journal that publishes scientific studies related to fundamental themes in life sciences. Some papers are published individually, while others are submitted for inclusion in special issues with guest editors. You are invited to contribute a research article, essay, or a review to be considered for publication.

Editor-in-Chief

Prof. Dr. Lluís Ribas de Pouplana

Institute for Research in Biomedicine (IRB Barcelona), The Barcelona
Institute of Science and Technology, 08028 Barcelona, Spain

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Biology) / CiteScore - Q1 (Paleontology)
