Special Issue

Multicellular Self-Assembly in Biofabrication

Message from the Guest Editors

Self-organizing multicellular structures behave as tissue-like biomaterials and are indispensable for fundamental research in developmental biology and wound healing, regenerative medicine (by replacing damaged tissues or promoting tissue regeneration) and translational medicine (as human disease models or tissue constructs for drug testing). This Special Issue aims to catalyze interdisciplinary collaborations between experts in molecular, cellular and tissue-scale phenomena involved in the self-assembly of live cells.

Guest Editors

Prof. Dr. Adrian Neagu

Prof. Dr. Ioan Kosztin

Prof. Dr. Gabor Forgacs

Deadline for manuscript submissions

closed (15 November 2021)

About the Journal

Message from the Editor-in-Chief

Life (ISSN 2075-1729) is an international, peer-reviewed open access journal that publishes scientific studies related to fundamental themes in life sciences. Some papers are published individually, while others are submitted for inclusion in special issues with guest editors. You are invited to contribute a research article, essay, or a review to be considered for publication.

Editor-in-Chief

Prof. Dr. Lluís Ribas de Pouplana
Institute for Research in Biomedicine (IRB Barcelona), The Barcelona Institute of Science and Technology, 08028 Barcelona, Spain

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Biology) / CiteScore - Q1 (Paleontology)
