New Insights in Musculoskeletal Pathophysiology: From Space to Fish, and Beyond

Message from the Guest Editor

Musculoskeletal disorders, mainly comprised of bone, muscle, tendon and joint diseases, represent one of the most common health problems worldwide with enormous socioeconomic burden. *During the last twenty years, new advances have been made in understanding the pathophysiology of musculoskeletal system.* Novel pathogenetic pathways have been identified leading to the discovery of new molecular targets for therapeutic approaches. Innovative methodologies such as microgravity conditions, mechanical loading experiments and 3D cellular models as well as novel biological approaches such as nutritional programming, chrono-biology, computational biology and utilisation of pioneering animal species have led the way to elucidate the mechanisms of musculoskeletal diseases like sarcopenia, osteoporosis and osteoarthritis. In this Special Issue of journal *Life*, we aim to collect articles that encompass the latest developments in musculoskeletal biology and provide a comprehensive update.

Guest Editor

Dr. Ioannis Kanakis

About the Journal

Message from the Editor-in-Chief

Life (ISSN 2075-1729) is an international, peer-reviewed open access journal that publishes scientific studies related to fundamental themes in life sciences. Some papers are published individually, while others are submitted for inclusion in special issues with guest editors. You are invited to contribute a research article, essay, or a review to be considered for publication.

Editor-in-Chief

Prof. Dr. Lluís Ribas de Pouplana

Institute for Research in Biomedicine (IRB Barcelona), The Barcelona
Institute of Science and Technology, 08028 Barcelona, Spain

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Biology) / CiteScore - Q1 (Paleontology)
