

## Special Issue

# The Increasing Role of Next Generation Sequencing Methods in Mutation Analysis

### Message from the Guest Editor

The implementation of next-generation DNA sequencing techniques has revolutionized molecular diagnostics. In the middle of an era where we are moving towards a more simplified workflow of mutation analysis, a lot of issues arise. There is a need for standardized wet lab and in silico analysis methods. In the case of exome and genome sequencing-based diagnosis, we have to deal with incidental findings and also with the evidence-based pharmacogenetic data that might be included in the personal healthcare database of the patient. The classification of detected mutations is also inevitable. Mutation-specific treatment is more and more widespread. Altogether, these improvements open up possibilities not only for personalized genome-based medicine, but also for predictive medicine as well. Molecular genetic diagnostics involves both germline and somatic mutation analysis; therefore, this Special Issue of the journal *Life*, covering the topic "The Increasing Role of Next Generation Sequencing Methods in Mutation Analysis" is open for research papers and reviews from both major fields of genetic testing, i.e., the analysis of inherited disorders and cancers.

### Guest Editor

Dr. István Balogh

Division of Clinical Genetics, Department of Laboratory Medicine,  
Faculty of Medicine, University of Debrecen, Debrecen, Hungary

### Deadline for manuscript submissions

closed (30 June 2021)

## About the Journal

### Message from the Editor-in-Chief

*Life* (ISSN 2075-1729) is an international, peer-reviewed open access journal that publishes scientific studies related to fundamental themes in life sciences. Some papers are published individually, while others are submitted for inclusion in special issues with guest editors. You are invited to contribute a research article, essay, or a review to be considered for publication.

### Editor-in-Chief

Prof. Dr. Lluís Ribas de Pouplana

Institute for Research in Biomedicine (IRB Barcelona), The Barcelona  
Institute of Science and Technology, 08028 Barcelona, Spain

---

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, CAPIus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q1 (Biology) / CiteScore - Q1 (Paleontology)
