Research and Management of Endocrine Tumors

Message from the Guest Editor

Endocrine tumors continue to be a problem for many patients all over the world. In particular, thyroid cancer has had a significant increase in incidence and prevalence in recent years and is the most common endocrine cancer. In many cases, it is a benign form of malignancy. However, there are many cases of thyroid cancer that present with metastatic progressive disease. As the pathophysiology and prognosis of thyroid cancer become better understood, the indications for treatment with radioiodine will change. Treatment with radioiodine, its indications, and procedural changes will be upgraded as our understanding of thyroid cancer biology and pathophysiology improves. Adrenal cancer is also a medical problem that poses diagnostic and therapeutic challenges for physicians and biologists. With applying diagnostic methods like computer tomography and magnetic resonance imaging, the discovery of adrenal masses becomes increasingly easy. However, most of these endocrine neoplasms are benign. The differential diagnosis of a possible adrenal cancer as well as its treatment pose a diagnostic and therapeutic problem with major interest.

We look forward to receiving your contributions.

About the Journal

Message from the Editor-in-Chief

Life (ISSN 2075-1729) is an international, peer-reviewed open access journal that publishes scientific studies related to fundamental themes in life sciences. Some papers are published individually, while others are submitted for inclusion in special issues with guest editors. You are invited to contribute a research article, essay, or a review to be considered for publication.

Editor-in-Chief

Prof. Dr. Lluís Ribas de Pouplana

Institute for Research in Biomedicine (IRB Barcelona), The Barcelona
Institute of Science and Technology, 08028 Barcelona, Spain

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Biology) / CiteScore - Q1 (Paleontology)
