

Special Issue

Chemical Evolution of Organic Molecules in Solar System Small Bodies

Message from the Guest Editors

On the occasion of a 50th anniversary milestone and a new chapter in the studies on organic molecules in space, this Special Issue aims to obtain new insights on the formation of the building blocks of planets and life by integrating the results from sample analyses and observations of various types of small bodies (meteorites, asteroids, comets, dwarf planets, IDPs, and AMMs), past small body explorations, and laboratory experiments. Young scientists and students are encouraged to submit their manuscripts in this field. Papers of future small body mission concepts are also welcome.

Please submit your work via the following link:

About the Journal

Message from the Editor-in-Chief

Life (ISSN 2075-1729) is an international, peer-reviewed open access journal that publishes scientific studies related to fundamental themes in life sciences. Some papers are published individually, while others are submitted for inclusion in special issues with guest editors. You are invited to contribute a research article, essay, or a review to be considered for publication.

Editor-in-Chief

Prof. Dr. Lluís Ribas de Pouplana

Institute for Research in Biomedicine (IRB Barcelona), The Barcelona
Institute of Science and Technology, 08028 Barcelona, Spain

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Biology) / CiteScore - Q1 (Paleontology)
